

TUNNEL ILLUSION

1. Draw a 10 x 10 cm square on the paper.
2. Place a light mark 5 mm from the corners as shown in the diagram.
3. Connect the four marks as shown in the diagram.
4. In the new square, make a mark on each side 5 mm from the corners and connect them.
5. Continue this way until the space in the center is too small to draw another square.
6. View your drawing from a distance. Some say the image resembles a tunnel, others think it looks like a pyramid or even a staircase. What do you think?
